

Emanuel Shirbint

Data Engineer | Snowflake & Cloud Data Platforms | ELT/ETL | DWH & Lakehouse

Ramat Gan, Israel | shirbintemanuel@gmail.com | linkedin.com/in/emanuel-shirbint-b89030a

Summary

Data Engineer with 15+ years building and optimizing data platforms across cloud and on-premises environments. Led an on-prem-to-Snowflake cloud migration for EMEA regional operations at Philip Morris International (PMI), including a full rewrite of regional business logic and the Snowflake data layer (data model, ELT transformations, SQL), with data-quality controls, reconciliation against source, and cloud performance and cost optimization. Deep background in DWH/Lakehouse (Medallion) architecture, ELT/ETL, data modeling, and SQL performance tuning on Snowflake, Microsoft Fabric, Azure, SQL Server, and Oracle. Comfortable across cross-country stakeholder work, UAT, and production data operations. English Advanced, Hebrew Advanced, Russian Native.

Skills

- Cloud Data Platforms: Snowflake (production), Microsoft Fabric, Azure (Data Factory, Synapse, OpenAI/ML); AWS and GCP (familiarity); On-Prem
- Data Engineering: ELT/ETL, data modeling, DWH & Lakehouse (Medallion), source-to-target mapping, data-quality & reconciliation, validation, exception handling
- Migration & Optimization: on-prem to cloud migration, performance/cost optimization, load optimization, runtime reduction, scaling
- SQL & Databases: SQL Server, T-SQL, Oracle PL/SQL, SQL performance tuning, OLAP (SSAS), reporting (SSRS)
- Tooling: SSIS, Azure Data Factory (ADF), Dataflow Gen2, Python, APIs, SFTP/EDI, CI/CD, Git, PowerShell/WinSCP
- ML & Forecasting (applied): Croston, ARIMA, Prophet, XGBoost; MASE/MAPE/WAPE evaluation; MLOps in Python/SQL
- Ways of working: UAT, cross-country stakeholder collaboration, monitoring, Dev/Test/Prod promotion

Experience

Data Engineer / BI — Philip Morris International (PMI) — 2025

- Led on-prem-to-Snowflake cloud migration for EMEA regional operations, moving core reporting and data processing to a modern cloud data platform.
- Performed a full rewrite of regional business logic (rules and exceptions), ensuring parity and correctness against the legacy on-prem system.
- Built and rewrote the Snowflake data layer end to end: data model, ELT transformations, and SQL.
- Implemented data-quality controls and reconciliation against source systems.
- Drove UAT and cross-country stakeholder collaboration across EMEA business units.
- Optimized cloud performance and load: reduced runtimes and improved cost efficiency and scaling on Snowflake.

Data / BI Engineer — Nito Tech Ltd, Tel Aviv — 01/2025 – Present

- Built an end-to-end DWH/Lakehouse (Medallion) in Microsoft Fabric over SAP and Priority ERP sources.
- Engineered ingestion and transformation with Azure Data Factory (ADF) and Dataflow Gen2, leveraging Azure OpenAI/ML.
- Productionized Python/SQL MLOps and forecasting pipelines (Croston, ARIMA, Prophet, XGBoost) evaluated with MASE/MAPE/WAPE.
- Delivered a closed-loop pipeline: ingestion to processing to forecast to report to SMTP delivery.
- Integrated vendor data via SSIS and SFTP (PowerShell/WinSCP), with source-to-target mappings, validation, exception handling, and monitoring.
- Established CI/CD with Dev/Test/Prod promotion; resolved production ETL, Unicode/RTL, and SQL Agent issues; integrated APIs.

BI Developer / Systems Analyst — Logica (Logica-IT), Tel Aviv — 2023 – 2024

- Built ETL from OLTP sources with SSIS into DWH schemas and data marts.
- Delivered OLAP models (SSAS) and reporting (SSRS); tuned high-volume SQL for performance.

BI Developer — ColmexPro — 2021 – 2023

- Built ETL and OLAP for financial and capital-markets data using SQL, SSIS, SSAS, SSRS, and Power BI.
- Delivered DWH and reporting over OLTP sources; tuned SQL for high-volume workloads.

BI Developer / Data Scientist — Tel Aviv University, Faculty of Medicine — 2019 – 2023

- Built analytics on medical Big Data and developed ML/predictive models in Python, R, and SQL.
- Automated QA for data and analytics workflows.

BI Systems Analyst — DXC Technology — 2017 – 2018

- Designed BI/DWH architectures and ER models (Erwin) over Oracle and SQL Server.
- Authored ETL/OLAP specifications; developed PL/SQL.

Quant & Systems / Data Analyst — InCyber (Finance & Capital Markets) — 2007 – 2017

- Developed Oracle PL/SQL and T-SQL on high-volume financial data.
- Built DWH/BI pipelines integrating market, transactional, reference, and risk data across Oracle and SQL Server (ETL/OLAP/DWH).

Education

- M.Sc. (With Honors), Information Systems Management — Polytechnic University of New York, USA, 2005 – 2007 (GPA 4.0)
- MBA, Finance & Investments — Peres Academic Center, Tel Aviv, 2007 – 2009
- B.A., Technology Management & Marketing — Jerusalem College of Technology (JCT), 2001 – 2006

Certifications

- BI Expert, SQL Server 2014 — John Bryce/Matrix (334 hours)
- DevOps & Cloud Automation Program — John Bryce/Matrix (coursework-applied)
- AI / Data Science / Machine Learning — John Bryce
- Systems Analysis in Advanced Technology Environments — John Bryce/Matrix

Languages

- English — Advanced
- Hebrew — Advanced
- Russian — Native
